technical and popular report.

Site-specific information was compiled for both historic and prehistoric sites from state agencies in Iowa, Minnesota, and Wisconsin, and from various local and regional institutions. More than 1,000 historically or architecturally significant sites and districts and, more than 1,400 prehistoric archaeological components were recorded and plotted on base maps. From the site configurations and from other data collected during the course of the records and literature review, a narrative framework for the interpretation of historic and prehistoric sites was developed. Recommendations to enhance the management of the archaeological and historical data base were provided.

Within the boundaries of Pool 2, 10 properties have been listed on the National Register of Historic Places. Among these are two historic districts, the Mendota Historic District and the Fort Snelling Historic District. Thirty-one archaeological sites have been recorded within the limits of the study area adjacent to navigation Pool 2.

INTRODUCTION:

Within the boundaries of Pool 2, 10 properties have been listed on The National Register of Historic Places. Among these 10 are 2 historic districts, The Mendota Historic District and The Fort Snelling Historic District. Individual structures for the districts are listed in the appended tabular data. Figures 1-7 provide locations for structures that have been noted as architecturally or historically significant.

Thirty-one archaeological sites have been recorded within the limits of the study area adjacent to navigation Pool 2. Table 1 provides a matrix for identified components, Figures 8-14 note the locations of these archaeological sites, and the data sheets for each site provide more specific information. It should be noted that site distributions are not based on comprehensive systematic survey and thus should not be used for predictive statements. Finally, sites categorized as ineligible unless specifically noted, means simply that they have not been evaluated in terms of National Register criteria.
